

JUNCTION
VENTURES

ENTREPRENEURSHIP
RESEARCH
FELLOWSHIP

The aim of the fellowship program is to encourage academicians and young researchers to indulge in more acclaimed researches which will not only help them in but also the entrepreneurship community. Through this it aimed to commission eight research project on important issues related to innovations and startup ecosystem. It was done through engaging university faculties, industry leaders and young researchers

As Junction Bangladesh has been working to facilitate innovators, researchers and entrepreneurs we initiated a Research Fellowship Program to address the challenges and opportunities in the field of entrepreneurship growth and to accelerate the growth of homegrown innovations in Bangladesh. This platform was called the “Entrepreneurship Research Fellowship” – initiated and facilitated by Junction and sponsored by EMK Center, and through this we brought educators, students and industry experts on the same platform.

Junction is a platform to facilitate the journey of homegrown innovations to become globally scalable social and tech solutions. Destination Driven is the slogan of Junction which means that all the services of junction aim to establish Bangladesh as a startup destination. Junction designs inclusive social good solutions to bring positive impact in the lives of various stakeholders in our society.

Recent years have been phenomenal for Bangladeshi innovators and startups. Amazing ideas have emerged which are now in prototype development to bring strong impact on the people and society. Some of the ideas are ruling the wheel of growth and some have faded. We have realized it is the rise moment of homegrown innovations to solve the challenges. The coming days are more promising for entrepreneurial minds who will make our world a better place. At this juncture, we felt that there is severe dearth of research and evidence-based knowledge on various aspects of startup and innovations ecosystem.

We also acknowledge that it is time for setting benchmark for a number parameters, which will help us to track progress in coming years.

Thus, Junction Bangladesh has initiated a research fellowship program in partnership with EMK Center. The idea is to commission four research projects on important issues related innovations and startup ecosystem in each cohort. For doing this, the idea is to engage teachers/ researchers and students as well as research talents in the industry through offering fellowships.

Entrepreneurship Research Fellowship (Season 2)

The Award of the Fellowship BDT 50,000

The objectives of the research fellowship program are to:

1. Inform the stakeholders about innovations and entrepreneurship ecosystem;
2. Connect academia with entrepreneurship;
3. Encourage stakeholders of entrepreneurship and academia in research and innovations;
4. Promote business research to development and research practitioners in Bangladesh.

An Initiative of Junction Bangladesh
